

Bitcoin Shopping Guide: Stores That Accept Cryptocurrency

Cryptocurrency refers to any form of digital currency that uses encryption to verify monetary transactions and protect itself from counterfeit. Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), and Ripple (XRP) are examples of popular cryptocurrencies. Since they are not controlled by authorities such as banks and governments, you can use them for online shopping anywhere in the world—as long as the store supports it as a payment method.

The increasing popularity of Bitcoin and other cryptocurrencies in the past decade led to more companies allowing them as a valid mode of payment.

Cryptocurrency is the Future

In the past decade, companies and consumers have begun to invest in cryptocurrency. Compared to credit and debit cards, using Bitcoins and other digital currencies incur lesser transaction fees. In addition, they're also very secure, so it's no wonder that online shoppers are starting to spend cryptocurrencies.

Do you know any other companies that accept cryptocurrency payments or donations? Feel free to leave a comment below.
